Experience

SalarySe (backed by Peak XV and Pravega)

Software Engineer, Founding Team (PPO)

Jan 2024 – Present

Gurugram, India

Product

- Sole backend engineer for **UPI Circle**, shipping both fully and partially delegated payments; finished first among **21 participating apps** and was the only app to build both modes, earning a spot in NPCT's **six-app showcase at GFF 2024**.
- Built UPI onboarding APIs for device binding, bank-account linking, VPA creation, and post-onboarding controls; enabled secure activation for **500K users**.
- Built webhook-driven payment-status processing and notifications; kept transaction records synchronized across **100K daily UPI transactions**.
- Built business-rule engines for loan and credit-card eligibility using **Experian** bureau reports; supported issuance of **25K credit cards**.
- Automated bill processing with **AWS Textract**, **PDFBox**, and LLM-based extraction and validation; auto-cleared **80% of bills** without manual review.
- Built rewards accrual and redemption flows for card and UPI transactions through external bank APIs; disbursed **INR 50M+** and redeemed **INR 10M+** in rewards monthly.

Platform

- Built an authentication and access-control system for the SalarySe app and partner dashboard using Redis, JWTs, and RSA-signed tokens; used scopes and partner attributes to restrict each partner to its permitted APIs and data.
- Re-architected the home-screen API to fan out to **8 services** in parallel with partial-failure isolation; cut p95 load time from **500ms to 75ms** across **42K requests/hour**.
- Optimized bulk credit-bureau ingestion with streaming parsing, JDBC batching, and cached sequence allocation; reduced database writes from **70M inserts to 25K batches** and eliminated shared-database CPU spikes.
- Introduced correlation-ID propagation across **11+ services** and asynchronous calls using gateway filters and MDC logging; made production errors traceable end-to-end in logs and Sentry.

BITS Pilani, Goa

Teaching Assistant — Digital Image Processing

Aug 2023 – Dec 2023

Goa, India

- Conducted MATLAB sessions for **60 students** in Digital Image Processing, using hands-on exercises to reinforce course concepts.
- Administered, invigilated, and evaluated **3 quizzes** with the instructor, ensuring consistent assessment across the cohort.

Swecha (NGO)

Web Development Intern

May 2022 – Jul 2022

Remote

- Built a live video-streaming and chat platform in **Elixir / Phoenix**, using Phoenix Channels over WebSockets for low-latency classroom interactions.

Projects

Correlation ID Spring Boot Starter

source ↗ · writeup ↗

- Spring Boot starter for validated request correlation across Spring MVC, async executors, scheduled jobs, and OpenFeign, with configurable headers and MDC integration.

Technical Skills

- Languages:** Java, Python, SQL, JavaScript, Bash
- Backend:** Spring Boot, Spring Data JPA, Spring Security, OpenFeign, Hibernate, REST, JUnit 5 / Mockito
- Data & Messaging:** PostgreSQL, Redis, DynamoDB, SQS
- Cloud & Infra:** AWS (S3, SQS, Textract), Docker, Kubernetes, GitHub Actions
- Observability:** Sentry, Prometheus, Grafana, Log4j2 + MDC, JaCoCo

Education

Birla Institute of Technology and Science (BITS), Pilani — Goa Campus

B.E., Electronics and Communication

Aug 2020 – Jun 2024

CGPA: 8.35/10

Relevant coursework: Data Structures & Algorithms, Software Development for Portable Devices, Communication Networks, Probability & Statistics, Digital Image Processing
