

Aayush Miglani

Backend Engineer — payments, rewards, distributed systems.

Gurugram, India · aayush8223@gmail.com · linkedin.com/in/aayushmiglani · github.com/AayushMiglani · aayushmiglani.github.io

EXPERIENCE

SalarySe · Software Engineer

Jan 2024 — Present

Gurugram, India

- Built core UPI payment flows scaling to **INR 1B+ monthly TPV across 200K+ users**, covering P2P, P2M, scan, intent, collect, mandates, and BBPS transactions.
- Implemented production payment safeguards: secure gateway request signing, idempotent transaction handling, webhook settlement processing, scheduled reconciliation, Redis caching, SQS fan-out, and pre-payment fraud controls.
- Built an event-driven employee benefits claim pipeline using UPI events, SQS, merchant categorisation, and state-based monthly distribution.
- Automated bill verification with **AWS Textract OCR**, LLM-based extraction, and validation checks for amount, merchant, tax ID, duplicates, and authenticity, **auto-clearing ~60% of bills without manual review**.
- Built a rewards platform **clearing INR 5M+ in monthly redemptions**, with configurable earn rules, daily/monthly cap enforcement, precomputed balance aggregates, and scheduled reconciliation.
- Built a backend-for-frontend for the app home screen that **cut p95 load time from 500ms to 75ms** through parallel service calls, aggregate timeouts, and per-section graceful degradation.
- Reworked bulk credit-bureau CSV ingestion from **70M inserts to 25K batched writes** using streaming parsing, JDBC batching, and cached sequence allocation, eliminating DB CPU spikes on a shared instance.
- Implemented request tracing across 11+ services with correlation IDs, gateway-level logging context, inter-service propagation, async context preservation, and Sentry error correlation.

BITS Pilani, Goa Campus · Teaching Assistant

Aug 2023 — Dec 2023

Goa, India

- Mentored 60+ students in Digital Image Processing and assisted the professor in conducting and invigilating course evaluation components.

Swecha (NGO) · Web Development Intern

May 2022 — Jul 2022

Remote

- Built a live video-streaming and chat platform in **Elixir / Phoenix**, using Phoenix Channels over WebSockets for low-latency classroom interactions.

SKILLS

LANGUAGES	Java, Python, SQL, JavaScript, Bash
BACKEND	Spring Boot, Spring Data JPA, Spring Security, OpenFeign, Hibernate, REST, JUnit 5 / Mockito
DATA / MESSAGING	PostgreSQL, Redis, DynamoDB, SQS
CLOUD / INFRA	AWS S3, AWS SQS, AWS Textract, Docker, Kubernetes, GitHub Actions
OBSERVABILITY	Sentry, Prometheus, Grafana, Log4j2 + MDC, JaCoCo

EDUCATION

BITS Pilani, Goa Campus

Aug 2020 — Jun 2024

Bachelor of Engineering in Electronics & Communication

CGPA 8.35 / 10

Relevant coursework: Data Structures & Algorithms, Software Development for Portable Devices, Communication Networks, Probability & Statistics.
