Experience

SalarySe

Software Engineer (Jul 2024 – Present) · Software Engineering Intern (Jan – Jun 2024)

Jan 2024 – Present

Gurugram, India

SalarySe UPI

- Owned backend APIs for UPI onboarding - device binding, bank-account linking, and VPA creation and implemented post-onboarding amount limits plus device/account blocks for **500K users**.
- Built webhook handlers for UPI payment-status updates, keeping transaction records in sync and triggering user notifications across **100K daily transactions**.

Employee Benefits

- Built a bill-processing pipeline that used **AWS Textract OCR** and LLMs to extract and validate fields from handwritten and printed bills, with a **PDFBox**- and LLM-based path for predefined PDF formats; **auto-cleared 80% without manual review**.

Rewards Engine

- Built rewards disbursement logic for SalarySe credit cards and UPI transactions, disbursing **INR 50M+ in rewards monthly**; also built redemption flows that let users apply rewards to UPI payments or convert them to cash through external bank APIs, processing **INR 10M+ in redemptions monthly**.

Homepage Aggregator

[writeup](#) ↗

- Reworked the app's home-screen API to fetch data from **8 services** in parallel, handling **42K requests/hour** while **cutting p95 load time from 500ms to 75ms**; unaffected sections remained available when a downstream service failed.

CSV Ingestion

[writeup](#) ↗

- Reduced database write operations for bulk credit-bureau CSV ingestion from **70M individual inserts to 25K batches** using streaming parsing, JDBC batching, and cached sequence allocation, eliminating CPU spikes on a shared database instance.

Distributed Tracing

[writeup](#) ↗

- Added end-to-end request tracing across **11+ services**, carrying correlation IDs from the API gateway through synchronous and asynchronous calls so errors could be traced in logs and Sentry.

BITS Pilani, Goa

Teaching Assistant — Digital Image Processing

Aug 2023 – Dec 2023

Goa, India

- Mentored 60+ students; supported evaluation, lab sessions, and invigilation.

Swecha (NGO)

Web Development Intern

May 2022 – Jul 2022

Remote

- Built a live video-streaming and chat platform in **Elixir / Phoenix**, using Phoenix Channels over WebSockets for low-latency classroom interactions.

Technical Skills

- Languages:** Java, Python, SQL, JavaScript, Bash
- Backend:** Spring Boot, Spring Data JPA, Spring Security, OpenFeign, Hibernate, REST, JUnit 5 / Mockito
- Data & Messaging:** PostgreSQL, Redis, DynamoDB, SQS
- Cloud & Infra:** AWS (S3, SQS, Textract), Docker, Kubernetes, GitHub Actions
- Observability:** Sentry, Prometheus, Grafana, Log4j2 + MDC, JaCoCo

Education

Birla Institute of Technology and Science (BITS), Pilani — Goa Campus

Aug 2020 – Jun 2024

B.E., Electronics and Communication

CGPA: 8.35/10

Relevant coursework: Data Structures & Algorithms, Software Development for Portable Devices, Communication Networks, Probability & Statistics, Digital Image Processing
